

VOYAGER HIGH EFFICIENCY GAS FIRED WATER HEATERS

THE NEW DIMENSION IN WATER HEATING TECHNOLOGY!

The Voyager high efficiency gas fired water heater is truly a unique appliance. The Voyager system is designed with the most advanced technology available. This use of modern technology optimizes the efficiency and operating reliability of each Voyager. The endless features will provide each customer with maximum savings on operation, space, and installation. The Voyager high efficiency gas fired water heater is setting a new dimension in water heating technology.

FEATURES

- 316L stainless steel construction
- 10 years warranty on residential applications; 6 years on commercial applications; and 6 years on components for residential and commercial applications. Other warranties are available, call factory.
- No chimney required; direct venting plastic pipe - easy to install, operate, and service
- Multiple heater installation for increased capacity
- Units may be stacked to save space.
- Compact design eliminates need for bulky storage tanks
- Efficiency of 95% dramatically reduces operating costs
- High output for any commercial application
- No burning pilot light
- Low emissions
- Plastic jacket with 2" environmentally-safe, CFC-free, Polyurethane, water-blown foam insulation
- Less than 1/2 degree F. per hour heat loss (R17)
- Corrosion resistant, high efficiency 90/10 Cupronickel heat exchanger
- Self-diagnostic electronic control featuring digital readout of water temperature, set point, and differential
- Front access cover to equipment is easily accessible
- Optional heat exchanger for floor radiant/baseboard heating
- Temperature range from 70 degrees F. to 180 degrees F.
- Zero clearance to any combustible surface; can be installed in almost any closet!
